# ABOUT US

## COMPANY PROFILE

Company Name	HASEGAWA CORPORATION
Founding Date	June 11th, 1955
Address	1384-5 Kamikoya, Yachiyo-shi, Chiba 276-0022 JAPAN
Business Lineup	Manufacturing & distributing of; -Kitchenware, Utensils -Waterproof Sheet Materials -Sports Equipments

## OUR HISTORY

HASEGAWA CORPORATION started as a manufacturer of sliding bases for skis about 70 years ago. The production of skis requires highly advanced adhesive technology.

Plastic, wood, and metals are common materials used in the manufacturing of kitchenware, each with its own advantages and disadvantages.

By combining these using our advanced adhesive technology, we bring highly functional and unconventional kitchenware to the world, featuring unique and advanced features.

### *The Best Sushi Mat Ever!* *Super Hygienic and Designed to Prevent Rice from Sticking!*

HASEGAWA-Makisu is a revolutionary sushi mat made with advanced plastic materials and monofilaments, instead of traditional bamboo and cotton strings. It is not only hygienic but also easy to roll as a sushi mat.

- No plastic wrap required.
- No splinters or black mold, common issues with conventional bamboo ones.
- Monofilament blinding strings that help deter contamination.
- Embossed surface that prevents ingredients from sticking.
- Quick-drying, allowing immediate reuse after washing.
- Rolls just as easily as traditional bamboo mats.

# Ohitsu

FHO-27

## FHO

### Reliable Heat Retention & Superior Hygiene!

Heat retention and hygiene are two of the most important concerns when selecting an ohitsu (sushi rice container) among sushi chefs. HASEGAWA's ohitsu is designed to address both of these critical requirements.

- Internal foam structure provides lightweight handling and excellent heat retention.
- Heat-resistant plastic surface withstands temperatures up to 80°C / 176°F.
- Hygienic material prevents black mold and contamination from wood chips.
- Non-porous surface is stain-resistant and easy to clean.
- Lightweight design allows for easy handling and daily maintenance.

\*The antibacterial property is only certified in Japan.

# Hangiri

FHG-60

FHG

## Unprecedented Hangiri that is Hygienic, Lightweight and super Durable!

Our Hangiri (sushi rice mixing bowl) is constructed from plastic and features an internal foam resin core that delivers high heat-retention performance along with a lightweight yet robust structure. Unlike conventional ones, it eliminates issues such as cracking and surface deterioration.

Free from concerns about wood debris or black mold, this hangiri offers superior hygiene. When used properly, it provides long-term durability and outstanding cost efficiency.

The interior foam resin is the source for heat retention that is important during sushi-rice mixing.

\*The antibacterial property is only certified in Japan.

# Hangiri Spatula

**FSOG**

## Specially Designed Spatula for Sushi Rice

This plastic spatula is perfect for Hangiri works (Sushi Rice Mixing).

Made from plastic resin, it prevents rice from sticking and eliminates common issues associated with wooden spatulas, such as wood residue and black mold. The thin tip ensures lightweight handling and smooth mixing, even into the corners of the bowl.

Additionally, the wave-patterned surface of the head helps distribute vinegar evenly, ensuring thorough and consistent mixing of the sushi rice.

\*The antibacterial property is certified only in Japan.

\*Sizes and colors may be changed without prior notice.

## Wood-Core Structure

### Reduced Weight

30% Lighter!  
(than solid plastic ones.)

Approximately 30% lighter than conventional solid plastic cutting boards, it reduces strain during hand washing.

In addition, the risk of injury or damage caused by accidental drops is minimized.

### High Rigidity

The wood-core prevents warping and bending from long term use and high-temp washing. Always stable, dishwasher safe, and shows sufficient rigidity when bridging.

Wood core prevents bending!

### Blade Friendly

Simple cutting boards made of soft materials are prone to deformation and bending.

HASEGAWA cutting boards incorporate a wood-core structure that ensures high rigidity, which makes it possible to use a soft surface material.

### Eco Friendly

Its wood-core structure minimizes plastic usage, while biomass-based materials account for an industry-leading 30%.

Furthermore, our factory operates entirely on solar power, using 100% renewable electricity.

# Pro-Soft

FSR20-6030

## FSR

**Wood-Core, Blade-Friendly Cutting Board**  
 The BEST cutting board ever for *Japanese knives!*

The internal wood-core structure prevents warping and deformation, making it possible to use a soft plastic surface. This design achieves blade friendliness comparable to that of wooden cutting boards, while maintaining the advantages of plastic.

- Trusted by sushi chefs worldwide.
- Selected for use at the World Sushi Cup JAPAN.

YouTube Video

\*The antibacterial property is only certified in Japan.

# Pro-PE

FPE20-6030W

FPE18-6030K

**FPE**

*Professional size of **Black** version is now available!*

Like the FSR series, it has a wood-core structure, that makes it lightweight and gives it high-rigidity. It is very easy to handle, difficult to become warped or deformed, hence it is applicable to high-temp washing.

With its slightly harder surfaces than the FSR series, it has a stain-resistant property. It can be used widely for general purposes, such as cutting veggies, meats, fish, etc.

This stylish black color showcases food nicely, making it the best cutting board for the chefs who showcase their work!

\*The antibacterial property is only certified in Japan.

# Cutting Board LIFTER

## Lift Cutting Boards from a Cooking Table for Sanitation

These are tools that lift cutting boards from a cooking table by placing them underneath the cutting boards. It is very hygienic as cutting boards do not come into direct contact with the cooking table.

- Helps keep the cutting board hygienic while allowing immediate use of the reverse side.
- The water-proof grip mats are mounted to hold cutting boards in place.
- The elevated position of cutting boards enables better efficiency to produce delicate cuttings.
- The space created below the cutting board will thus allow ease of placing any utensil, trays or plates for collecting the finely cut ingredients from the cutting board.

Knockdown Structure

Non-Slip Grip

\*The antibacterial property is certified only in Japan.

# Cutting Board BRUSH

CBB-100

**CBB**

Regular Use

Stubborn Stains

*An Ultimate Tool for Cleaning Cutting Boards!*

HASEGAWA Cutting Board BRUSH features ultra-fine bristles designed to reach deep into grooves, knife cuts, and embossed surfaces to thoroughly remove trapped debris and food residue that regular washing can miss. Its specially engineered brush head delivers powerful cleaning while protecting the board's surface.

- Exceptional brushing power — fine bristles penetrate grooves and scratches to remove embedded dirt and buildup.
- Helps maintain hygiene by eliminating debris in hard-to-reach areas before it turns into stains or odors.
- For the best results, move the brush in small circular motions across the surface.
- Suitable for all types of cutting boards, making it a versatile and essential daily cleaning tool.

Before Brushing

# Cutting Board SCRAPER

CBS2-115P

CBS

Roughing Side

Finishing Side

*The Perfect Tool for  
Cutting Board Maintenance!*

\*This scraper is not recommended for use on our black cutting board (Pro-PE, Pro-PE Lite), as abrasions may be noticeable.

HASEGAWA Cutting Board SCRAPER is designed to maintain cutting board hygiene by removing deep-seated stains, discoloration, mold, surface damage, and feathering that cannot be eliminated by normal washing.

YouTube Video

- Use the roughing side to remove tough, embedded dirt, then switch to the finishing side to restore a smooth surface. This process also eliminates feathering and unpleasant odors, helping to prevent contamination by foreign particles.
- No cleaning agents required, only water is needed during scraping. After scraping, simply wash the cutting board with detergent as usual.
- Dirt that accumulates over long periods becomes difficult to remove. Regular weekly scraping helps maintain cleanliness and extends the cutting board's safe usable life.

*Rejuvenating  
Cutting Boards!!*

\*The antibacterial property is only certified in Japan.
